Re: Requested Tax Impact Information
Date: December 18, 2006

School Committee member Bob Pulver asked for more detailed analysis of the tax impact in regard to the two referendum questions being presented to the voters on January 23, 2007. Specifically he asked for a break out of each question.

Using the same criteria as the previous reports I've done on this question (i.e. the debt repayment, the current 4/1/06 valuation, the average residential home value \$225,000), I calculate the following additional information.

	Mill Rate Average	Mill Rate Highest	Mill Rate Lowest	Average Cost/Year	Highest Cost/Year	Lowest Cost/Year
Addition/Gym Only	0.911	1.187	0.571	\$205.13	\$267.18	\$128.49
Renovations Only	0.195	0.195	0.195	\$43.96	\$43.96	\$43.96
Aggregate	1.005	1.383	0.571	\$226.06	\$311.13	\$128.49
Year		FY 2009	FY 2008		FY 2009	FY 2008

I've attached the spreadsheet used to calculate this report as an excel file.

Respectfully submitted,

Stu Marckoon, Treasurer
